DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP944801A1.

EP944801 discloses the claimed invention except the discharge collector being oriented parallel to the heating gas flow direction. It is noted that one of ordinary creativity, common sense and logic would find it reasonably obvious to change the orientation of the discharge collector based on the size and shape requirements of the specific application of this technology, as the direction does not seem to effect the operation of the device in any substantial way. It is further noted, that the functional "such that" statement does not define any structure and accordingly can not serve to distinguish.
